

VYTERRO

BRAND IDENTITY GUIDE

VYTERRO

Prepared July 20, 2026

Primary Lockup

The primary logo pairs the shield & V emblem with the VYTERRO wordmark. Use this full lockup whenever there is enough horizontal space — website headers, letterhead, presentation covers, and signage.

ON NAVY / DARK BACKGROUNDS

ON WHITE / LIGHT BACKGROUNDS

Icon Mark & Clear Space

The shield-and-V emblem works alone as a favicon, app icon, social profile image, or watermark, wherever the full wordmark won't fit.

MAINTAIN CLEAR SPACE AROUND THE MARK EQUAL TO THE HEIGHT OF THE SHIELD — KEEP OTHER LOGOS, TEXT, AND EDGES OUTSIDE THAT MARGIN.

Digital minimum
32×32px

Favicon minimum
16×16px

Print minimum
0.5in / 36pt

Common Mistakes

Protect the mark's legibility and metallic finish — avoid these treatments on the website or anywhere else the logo appears.

Don't distort

- ✗ Never stretch or squeeze the lockup off its natural proportions.

VYTERRO

Don't bury the contrast

- ✗ Never place the silver mark on light gray or low-contrast backgrounds.

VYTERRO

Don't recolor

- ✗ Keep the navy-and-silver metallic palette — don't re-tint the mark to other brand or accent colors.

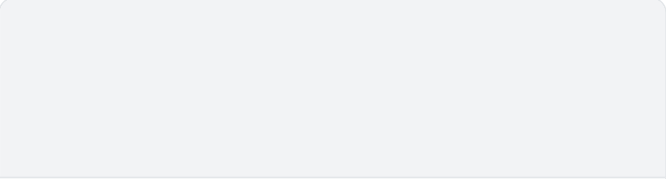

VYTERRO

Don't rotate

- ✗ Always present the lockup level — no tilting or angling for effect.

Palette

Vyterro's palette is a deep navy paired with a brushed metallic silver — built to read as secure, established, and precise. Values below are estimated from the shared logo artwork; confirm against the original files if exact color-matching (e.g. print Pantone) is required.

 Vyterro Navy — Primary HEX #0E1E38 RGB 14, 30, 56 CMYK 75, 46, 0, 78 Primary background, headers, buttons	 Deep Navy — Shade HEX #080F1E RGB 8, 15, 30 CMYK 73, 50, 0, 88 Footers, hover states, gradients
 Steel Blue — Accent HEX #1B3A63 RGB 27, 58, 99 CMYK 73, 41, 0, 61 Links, highlights, secondary accents	 Platinum White — Light HEX #F2F3F5 RGB 242, 243, 245 CMYK 1, 1, 0, 4 Page backgrounds, reversed text
 Vyterro Silver — Metallic HEX #9BA6B1 RGB 155, 166, 177 CMYK 12, 6, 0, 31 Logo metallic tone, dividers, icons	 Gunmetal — Dark neutral HEX #4B5560 RGB 75, 85, 96 CMYK 22, 11, 0, 62 Body copy on light backgrounds

Type System

LOGOTYPE (RESERVED FOR THE LOGO ONLY)

VYTERRO

Recommended: Cinzel or Trajan Pro

Preview above set in Nimbus Roman Bold (closest font available in this environment) — use Cinzel (free on Google Fonts) or Trajan Pro for production art. This bold, wide-tracked classic serif is what’s already baked into the logo artwork — don’t use it for headlines or body copy on the site.

HEADLINE FONT

Precision. Trust. Vyperro.

Recommended: Playfair Display

Preview above set in Lora (closest local stand-in) — Playfair Display is free on Google Fonts and available in every major website builder’s font picker.

BODY / UI FONT

Vyperro pairs a confident serif headline with a clean, highly legible sans-serif for body copy, navigation, and buttons — this keeps long-form text readable at small sizes across the website while the serif carries brand personality in headlines.

Recommended: Montserrat (headings-adjacent UI) or Inter (body)

Preview above set in Poppins — a close local stand-in with the same geometric sans character as Montserrat/Inter.

USE	FONT	WEIGHT
Logo wordmark	Cinzel / Trajan Pro	Bold
Page headlines / H1–H2	Playfair Display	Bold / SemiBold
Subheads / nav	Montserrat	SemiBold
Body copy	Inter	Regular / Medium
